Ministry of Personnel, Public Grievances and Pensions

Department of Personnel and Training

[Training Division]

Block-4, Old JNU Campus New Mehrauli Road, New Delhi-67 Dated: the 22nd of December 2014

TRAINING CIRCULAR

Sub: Group Training Course in "Building Information System for the shift Towards E-government (D)" to be held in Japan from March 25 to August 07, 2015 under the Technical Cooperation Programme of the Government of Japan.

The undersigned is directed to state that the Japan International Cooperation Agency (JICA) has invited applications for the above mentioned training programme to be held in Japan from March 25 to August 07, 2015 under the Technical Cooperation Programme of the Government of Japan.

- 2. The programme aims at enabling IT staff to acquire wide-range of skill sets required for leading the management and implementation of information security in his/her organizations to provide secure government services.
- 3. The programme is offered to IT staff member expected to lead the management and implement information security; IT staff member involved in the management and/or implementation of information security; Network Specialist; Application Developer;
- 4. The applying organizations are expected to select those candidates who are Information security officer or be responsible for information security management in government or other related organizations with more than three (3) years or equivalent experience as an Application Developer or a Network Specialist. Experience in information security or related field would be desirable. The applicant for this course should have undergraduate or post graduate degree; should have competent command over spoken and written English; must be in good health (both physically and mentally); must not be a part of military service and should be between twenty five (25) to forty (40) years of age.
- 5. In addition to above, the following information in respect of the nominated officers may please be mentioned while furnishing the nomination:
 - a) Whether attended any foreign training programme in the past? If so, the duration/detail thereof;
 - b) Whether cleared from vigilance angle;
 - c) Age;
 - d) Whether working in North East State/J&K;
 - e) A brief in 50-100 words justifying the nomination.

- 6. The course covers the cost of a round-trip air ticket between international airport designated by JICA and Japan; travel insurance from the time of arrival in Japan to departure from Japan; allowances for (accommodation, living expenses, outfit and shipping); expenses for JICA study tours and free medical care for participants who may fall ill after reaching Japan (costs relating to pre-existing illness, pregnancy, or dental treatment are not included).
- 7. It is therefore requested that the nomination of suitable candidates may please be forwarded (in duplicate) in JICA's prescribed form (available in persmin.nic.in > DOPT > Training Wing > Circular > JICA) to this Department duly authenticated by the HOD of the concerned department in accordance with the eligibility criteria.
- 8. The applications should reach this Department through the Administrative Ministry/State Government not later than **January 10, 2015.** Nominations received after the prescribed date will not be considered. The details of the programme may be drawn from Ministry of Personnel, Public Grievances and Pensions' website (**persmin.nic.in**).

(N.K. Wadhwa)

Under Secretary to the Government of India Tele.No.011-26165682

Copy to:

- a) The Secretary, Ministry of Communication and Information Technology, Electronics Niketan, 6, CGO Complex, Lodhi Road, New Delhi-110003
- b) The Chief Secretaries to all the State Governments/Union Territories(with request to circulate the same amongst their related Departments/Organizations),
- c) NIC with request to post the circular along with the JICA's circular on this Department's website.

GROUP AND REGION-FOCUSED TRAINING

GENERAL INFORMATION ON

BUILDING RELIABLE INFORMATION SYSTEM FOR THE SHIFT TOWARDS E-GOVERNMENT (D) 課題別研修「e-Government 安定のための情報システム運用管理 (D) 」 JFY 2014

NO. J1404240 / ID. 1480158
From February 2015 to February 2016
Phases in Japan: From March 25, 2015 to August 7, 2015

This information pertains to one of the Group and Region-Focused Training of the Japan International Cooperation Agency (JICA), which shall be implemented as part of the Official Development Assistance of the government of Japan based on bilateral agreement between both Governments.

I. Concept

Background

Information and communication technologies (ICT) are today recognized as key enablers for realizing sustainable development by offering tremendous opportunities for developing countries to fully share in the benefits of the globalization. The ICT, in fact, enables all citizens to access basic services, such as education, healthcare, agro-services or financial services regardless of sex, age, nationality, or any other factor created by society.

The ICT has also been proven to be a key tool for a government to improve its work efficiency and cost effectiveness. The use of the ICT in governments' services (so-called "e-government") has therefore been rapidly increasing all around the world today. In Japan, the government has started since 70's the promotion of various e-government initiatives such as online use of administrative procedures, electronic provision of government information, optimization of work and systems, improvement of government procurement related to information systems, and information security measures.

Nevertheless, such digitalization of government's services often remains a challenge in developing countries, not only because of the lack of adequate infrastructures but also because of the lack of highly skilled ICT officers. In this context, JICA Okinawa offers a series ICT training program with the view of empowering ICT officers to design, develop and manage efficient ICT solutions, which can assist governments of developing countries in their efforts of shifting towards e-government.

For what?

This information security course aims at enabling IT staff to acquire wide-range of skill sets required for leading the management and implementation of information security in his/her organizations to provide secure government services.

For whom?

- IT staff member expected to lead the management and implement information security;
- IT staff member involved in the management and/or implementation of information security;
- Network Specialist;
- Application Developer;

How?

This course places its main focus on practical exercises rather than lectures, because JICA Okinawa believes that the more times that people practice something the more likely people are to learn and remember it. This is especially true for technical training program like this one.

1. The course will therefore be composed of a variety of activities such as interactive lectures and observation tours to be conducted both in Okinawa and in mainland of Japan. Also, the

Participants will undertake a 20 days practical group exercises to mark the end of the training. Using real case studies, the Participants will plan information security policy and compliance auditing, based on current status of information assets of their organizations, to achieve the goal to deliver secure government services. Such a practice oriented method enables the Participants to become a truly skillful ICT officer.

Furthermore, as one of major outcomes of this course, the Participants will develop an ICT project entitled "Action Plan", which aims to resolve the business problem of the Participating Organization. In order to assist the Participant in implementing the Action Plan, the training implementer will provide technical advice beyond the completion of the core phase in Japan for the period of six months.

II. Description

1. Title (J-No.): Building Reliable Information System for the shift towards e-government (D) (J1404240)

2. Course Period in JAPAN

March 25, 2015 to August 7, 2015

3. Target Regions or Countries

Bangladesh, India, Iraq, Laos, Libya, Rwanda, Tuvalu, and Zimbabwe

4. Eligible / Target Organization

This program is designed for a central government and other governmental organizations aimed at enhancing their ICT uses in their work and service delivery.

5. Course Capacity (Upper limit of Participants)

12 participants

6. Language to be used in this program: English

7. Course Objective

To develop human resources that can design and manage information security systems in the central government and local governments

8. Overall Goal

To ensure security of the information systems of the participants' organizations and to secure delivery of those government services

Expected Module Output and Contents:

<Overall Goal>

To ensure security of the information systems of the participants' organizations and to secure delivery of those government services

<Course Objective>

To develop human resources that can design and manage information security systems in the central government and local governments

<Module 4 Objective>

To acquire skills in planning the implementation of necessary and feasible information security measures into the organization.

<Module 3 Objective>

To acquire skills how to determine accurate countermeasures against threats and skills of design, development and management in implementing information security systems

<Module 2 Objective>

To understand effective solutions to improve the information security

<Module 1 Objective>

To acquire skills on analyzing organization's current information security and identifying problems

<Structure of the program>

Aiming to foster Participants' skills and to assist them in developing an effective and implementable ICT project ("Action Plan"), this course is designed as below. Please carefully read this section and ensure the preparation.

1. **Preparatory Phase in Participants' country** (February to March 2015)

Before coming to Japan, the Participants are requested to take following actions:

- 1) Read carefully the present document entitled "General Information".
- 2) Identify key business challenges of his/her organization and decide the topic of the Action Plan. Try to obtain the approval from the management to facilitate the implementation in the later stage.
- 3) Fill out the preliminary study sheet and other required forms to be provided by the training implementer.

2. **Core Phase in Japan** (March 25, 2015 to August 7, 2015)

N.B. This is an interim version and the content and duration of each subject can be modified in due course.

#	Subject name

3. Set up a mail server. 4. Set up a proxy server. 5. Set up a proxy server. 5. Set up a proxy server. 6. Set up a proxy server. 7. Illustrate trends in information security management. 7. Illustrate basic roles of security policy. 8. Describe formulation procedure of security policy. 9. Describe management measures based on ISO/IEC27002. 10. Network Security 11. Illustrate threats to network and countermeasures. 12. Indicate security considerations at time of network design/configuration. 13. Information Security Audit 12. Describe information security audit system 13. Describe information security audit standards and management standards 14. Describe audit procedures 15. Implement audit and prepare audit reports 16. ISMS Building 17. Describe outline of Information Security Management Systems (ISMS) Conformity Assessment Scheme. 18. Describe functions, configuration and operation environment of firewall. 19. Describe roles and outline of firewall. 20. Describe functions, configuration and operation environment of firewall. 31. Install/operate firewall. 42. Describe functions detect unauthorized Access 43. Implement detection of unauthorized Access 44. Implement detection of unauthorized access. 45. Implement detection of unauthorized access. 46. Implement detection of unauthorized access. 57. Implement detection of unauthorized access. 58. Implement countermeasures against unauthorized access. 59. Implement detection of unauthorized access. 50. Implement detection of unauthorized access. 50. Implement detection of unauthorized access. 50. Implement detection of unauthorized access. 51. Illustrate methods to detect unauthorized access of servers and countermeasures. 52. Indicate procedures and methods of risk analysis. 53. Conduct risk assessment of information assets. 54. Identify unauthorized access and methods of risk analysis. 55. Conduct risk assessment and select appropriate management measures.	3. Set up a mail server. 4. Set up a www server. 5. Set up a proxy server. 5. Set up a proxy server. 6. Set up a proxy server. 7. Illustrate trends in information security management. 9. Illustrate basic roles of security policy. 1. Describe formulation procedure of security policy. 2. Illustrate breast to network and countermeasures. 2. Indicate security 1. Illustrate threats to network and countermeasures. 2. Indicate security considerations at time of network design/configuration. 17. Information Security Audit 1. Describe information security audit system 2. Describe information security audit standards and management standards 3. Describe audit procedures 4. Implement audit and prepare audit reports 18. ISMS Building 1. Describe outline of Information Security Management Systems (ISMS) Conformity Assessment Scheme. 2. Describe southine of Information Security Management Systems (ISMS) Conformity Assessment Scheme. 3. Indicate considerations at time of ISMS configuration. 19. Firewall Building 1. Describe roles and outline of firewall. 2. Describe roles and outline of firewall. 3. Install/operate firewall. 4. Extract user requirements and set up to firewall. 5. Illustrate methods to detect unauthorized Access 6. Implement detection of unauthorized access. 7. Implement detection of unauthorized access. 8. Implement detection of unauthorized access. 9. Implement detection of unauthorized access. 1. Illustrate methods to detect unauthorized access. 2. Implement detection of unauthorized access. 3. Implement detection of unauthorized access. 4. Identify unauthorized access types and implement countermeasures. 5. Indicate procedures and methods of risk analysis. 6. Conduct risk assessment and select appropriate management measures.				4 days	
4. Set up a www server. 5. Set up a proxy server. 5. Set up a proxy server. 7. Formulation of Information Security Policy 7. Illustrate trends in information security management. 7. Illustrate basic roles of security policy. 8. Describe ormulation procedure of security policy. 9. Describe management measures based on ISO/IEC27002. 16. Network Security 1. Illustrate threats to network and countermeasures. 2. Indicate security considerations at time of network design/configuration. 17. Information Security Audit 1. Describe information security audit system 2. Describe information security audit standards and management standards 3. Describe audit procedures 4. Implement audit and prepare audit reports 18. ISMS Building 1. Describe outline of Information Security Management Systems (ISMS) Conformity Assessment Scheme. 2. Describe ISMS standards. 3. Indicate considerations at time of ISMS configuration. 19. Firewall Building 1. Describe roles and outline of firewall. 2. Describe functions, configuration and operation environment of firewall. 3. Install/operate firewall. 4. Extract user requirements and set up to firewall. 5. Install/operate firewall. 6. Extract user requirements and set up to firewall. 7. Illustrate methods to detect unauthorized access 7. Implement detection of unauthorized access 8. Implement countermeasures against unauthorized access 9. Implement countermeasures and implement countermeasures. 1. Illustrate methods to detect unauthorized access 1. Lecture and Exercise 1. Describe assessment of information assets. 2. Indicate procedures and methods of risk analysis. 3. Conduct risk assessment and select appropriate management measures.	4. Set up a www server. 5. Set up a proxy server. 6. Illustrate trends in information security Policy 1. Illustrate basic roles of security policy. 4. Describe management measures based on ISO/IEC27002. 16 Network Security 1. Illustrate threats to network and countermeasures. 2. Indicate security considerations at time of network design/configuration. 17 Information Security Audit 1. Describe information security audit system 2. Describe information security audit standards and management standards 3. Describe audit procedures 4. Implement audit and prepare audit reports 18 ISMS Building 1. Describe outline of Information Security Management Systems (ISMS) Conformity Assessment Scheme. 2. Describe lSMS standards. 3. Indicate considerations at time of ISMS configuration. 19 Firewall Building 1. Describe roles and outline of firewall. 2. Describe functions, configuration and operation environment of firewall. 3. Install/operate firewall. 4. Extract user requirements and set up to firewall. 5. Illustrate methods to detect unauthorized access 1. Illustrate methods to detect unauthorized access 2. Implement countermeasures. 3. Implement countermeasures against unauthorized access of servers and countermeasures. 3. Implement countermeasures. 3. Implement countermeasures against unauthorized access of servers and countermeasures. 4. Identify unauthorized access types and implement countermeasures. 5. Indicate procedures and methods of risk analysis. 6. Conduct risk assessment and select appropriate management measures.			Exercise		
5. Set up a proxy server. Formulation of Information Security Policy 1. Illustrate trends in information security management. 2. Illustrate basic roles of security policy. 3. Describe formulation procedure of security policy. 4. Describe management measures based on ISO/IEC27002. Network Security 1. Illustrate threats to network and countermeasures. 2. - Closing Ceremony

3. Finalization Phase in a Participant's home country (August 2015 to February 2016) : "Implementation of the Action Plan"

The final phase of the training course consists of the implementation of the Action Plan developed at the module 4 in Japan. In order to monitor the progress and to provide technical advices, Participants are requested to submit the "Action Plan Implementation Report" to the training implementer in 3rd and 6th month from the date following their return.

In this respect, Participants' organizations are requested to provide support to the Participant in their efforts of implementing his/her Action Plan, particularly by:

- 1) Allocating required human and financial resources;
- 2) Including the Action Plan related tasks in Participant's daily workload;
- 3) Interacting with the training implementer through the "Action Plan Implementation Report"*.
- * Note that the purpose of "Action Plan Implementation Report" is not only for JICA to monitor the impact of this training course, but also for Participants to obtain technical advices from highly skilled IT professionals whenever it is required. It is therefore strongly recommended to submit the report in a timely manner with accurate information.

III. Conditions and Procedures for Application

1. Expectations from the Participating Organizations:

- (1) This training program aims to assist government and other related organizations in their efforts of implementing e-government initiatives, particularly by fostering skills of their IT officers and by assisting them in developing an effective and implementable ICT project (so-called "Action Plan").
- (2) In the view of above and to maximize the impact of this training course, Participating Organizations are expected to provide full support to the Participants, particularly by providing following assistance:

Before departure:

Undertake brainstorming sessions to identify Organization's most important business challenges and define the theme of the Action Plan.

During the core Phase in Japan:

Monitor the progress of Participant's Action Plan and make sure that it aligns with Organization's current priority.

After completion of the Japan phase:

Support the Participant in implementing the Action Plan as described in the Section II-3.

2. Nominee Qualifications:

Applying Organizations are expected to select nominees who meet the following qualifications.

(1) Essential Qualifications

- 1) Current Duties: Information security officer or be responsible for information security management in government or other related organizations.
- 2) Experience in the relevant field: Three (3) years or equivalent experience as an Application Developer or a Network Specialist. Experience in information security or related field would be desirable.
 - Educational Background: Undergraduate or post graduate degree.
- 3) Language: Excellent command of spoken and written English equivalent to TOEFL iBT 79 or higher (Note that all the Participants will be required to make presentations, participate in group discussions and formulate their action plans in English. Please attach a photocopy of an official certificate for English ability such as TOEFL, TOEIC, IELTS etc).
- 4) Health: Must be in good health, both physically and mentally, to participate in the Program in Japan, which will run in total for 4 months.

 Pregnant candidates should carefully read the point 3 (1) of this chapter.
- 5) Must not be serving any form of military service.

(2) Recommendable Qualifications

Expectations for the Participants:

- 1) Age: Between the ages of twenty-five (25) and forty (40) years.
- 2) Job position: Executive officer/Management level or higher

3. Required Documents for Application

(1) Application Form: The Application Form is available at the JICA office (or the Embassy of Japan).

*Pregnancy

Pregnant participants are strictly requested to attach the following documents in order to minimize the risk for their health.

- 1) letter of the participant's consent to bear economic and physical risks
- 2) letter of consent from the participant's supervisor
- 3) doctor's letter with permission of her training participation.

 More information will be provided by National Staffs of JICA office in country in this respect.
- **(2) Nominee's English Score Sheet**: to be submitted with the application form. If you have any official documentation of English ability. (e.g., TOEFL, TOEIC, IELTS)
- (3) Photocopy of passport: to be submitted with the application form, if you possess your passport which you will carry when entering Japan for this program. If not, you are requested to submit its photocopy as soon as you obtain it.

*Photocopy should include the followings:

Name, Date of birth, Nationality, Sex, Passport number and Expire date.

- (4) ANNEX 1 (APPLICANT'S PROFESSIONAL EXPERIENCE IN THE FIELD OF ICT): Information collected from this form will be used to evaluate the eligibility of each candidate to the present course. It is therefore imperative to include the duly completed form in the application.
- (5) ANNEX 2 (COUNTRY REPORT)

4. Procedures for Application and Selection:

(1) Submission of the Applications:

Closing date for applications: Please inquire to the JICA office (or the Embassy of Japan).

(After receiving applications, the JICA office (or the Embassy of Japan) will send them to **the JICA Center in JAPAN** by 23 January, 2015)

(2) Selection:

After receiving the documents through proper channels from your government, the JICA office (or the embassy of Japan) will conduct screenings, and then forward the documents to the JICA Center in Japan. Selection will be made by the JICA Center in consultation with concerned organizations in Japan. The applying organization with the best intention to utilize the opportunity of this program will be highly valued in the selection.

(3) Notice of Acceptance

Notification of results will be made by the JICA office (or the Embassy of Japan) **not later** than <u>23 February</u>, <u>2015</u>.

5. Conditions for Attendance: to strictly adhere to the program schedule.

- (1) not to change the program topics.
- (2) not to extend the period of stay in Japan.
- (3) not to be accompanied by family members during the program.
- (4) to return to home countries at the end of the program in accordance with the travel schedule designated by JICA.
- (5) to refrain from engaging in any political activities, or any form of employment for profit or gain.
- (6) to observe Japanese laws and ordinances. If there is any violation of said laws and ordinances, participants may be required to return part or all of the training expenditure depending on the severity of said violation.
- (7) to observe the rules and regulations of the accommodation and not to change the accommodation designated by JICA.

IV. Administrative Arrangements

1. Organizer:

(1) Name: JICA Okinawa

(2) Contact: FUJIMOTO, Makoto, JICA OKINAWA (oicttp@jica.go.jp)

2. Implementing Partner:

(1) Name: i-Learning Co.

(2) URL: http://www.i-learning.jp/

3. Travel to Japan:

(1) Air Ticket: The cost of a round-trip ticket between an international airport designated by JICA and Japan will be borne by JICA.

(2) Travel Insurance: Coverage is from time of arrival up to departure in Japan. Thus traveling time outside Japan will not be covered.

4. Accommodation in Japan:

JICA will arrange the following accommodations for the participants in Japan:

JICA Okinawa International Center (JICA OKINAWA)

Address: 1143-1 Aza-Maeda, Urasoe-shi, Okinawa 901-2552, Japan

TEL: +81-98-876-6000 FAX: +81-98-876-6014

(where "81" is the country code for Japan, and "98" is the local area code)

If there is no vacancy at <u>JICA OKINAWA</u>, JICA will arrange alternative accommodations for the participants.

5. Expenses:

The following expenses will be provided for the participants by JICA:

- (1) Allowances for accommodation, meals, living expenses, outfit, and shipping
- (2) Expenses for study tours (basically in the form of train tickets.)
- (3) Free medical care for participants who become ill after arriving in Japan (costs related to pre-existing illness, pregnancy, or dental treatment are <u>not</u> included)
- (4) Expenses for program implementation, including materials

 For more details, please see "III. ALLOWANCES" of the brochure for participants titled

 "KENSHU-IN GUIDE BOOK," which will be given before departure for Japan.

6. Pre-departure Orientation:

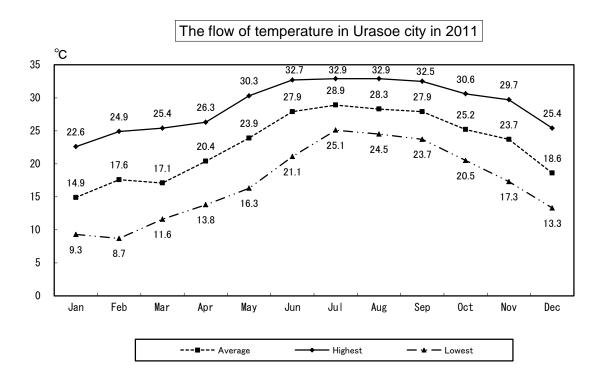

A pre-departure orientation will be held at the respective country's JICA office (or Japanese Embassy), to provide participants with details on travel to Japan, conditions of the workshop, and other matters.

V. Other Information

1. Climate of Okinawa

Okinawa is located at sub-tropical zone (southern edge of Japan) but climate varies depending upon seasons. While it is hot and heavily humid in the summer season (June to October), it becomes a bit chilly in the winter season (December to March) due to strong northerly wind. Participants are recommended to bring suitable clothing (details are mentioned in below4.)

The following diagram is the flow of temperature in Urasoe city where JICA Okinawa International Center (OIC) is located (Data source: homepage of Urasoe City).

2. Main facilities in JICA OIC

OIC is equipped with a variety of facilities for training and welfare activities such as seminar rooms, library, study room with computers, accommodation rooms (details are mentioned in below 3.), dining hall, clinic for medical consultation, gym, tennis court, a swimming pool (available from May to October), Japanese-style room for tea ceremony and recreation rooms.

At OIC dining hall, "HALAL" meals for the Muslim and vegetarian meals are available.

Internet connection available (either by cable or WiFi) at accommodation rooms and other buildings.

3. Accommodation in JICA OIC

OIC accommodation building has 96 single rooms. Every room is furnished with bed, desk, chair, bookshelf and closet. Also, there are TV (with satellite channel), DVD player, safety box, telephone, LAN cable jack, etc. in each room.

OIC accommodation building has tea lounge, smoking room and laundry room on each floor.

And also washing machines and irons are available for free. Towels and toiletries are provided upon check-in. Please note that cooking at OIC accommodation is strictly prohibited.

4. Clothing

It is recommended to bring appropriate clothing according to the season during Participants stay in Okinawa. *refer 1. Climate of Okinawa.

There are a few occasions like opening and clothing ceremonies when training participants are kindly requested to wear formal clothing. Nevertheless, casual clothing is acceptable even during training hours of most of the training program.

It is strongly recommended to bring your national or traditional dress for opening & closing ceremony and for other activities that participants may have opportunities to join. And also any handicrafts and folk crafts items which could be used to exhibit your culture are welcomed. OIC has display corner to introduce world culture to the visitors.

If your training program includes practices such as plant visit or outdoor activities, suitable uniform/clothing will be provided by JICA or a visiting site upon arrival.

5. International Exchange Program with Local Communities

JICA encourages international exchange between JICA participants and local communities. Participants are therefore strongly recommended to bring their national or traditional dress and materials like photographs, video tapes, DVDs and audio CDs that demonstrate their countries' interesting culture. This may make the exchange program more fruitful. Furthermore, any other items which may be useful to exhibit your culture are welcomed. JICA OKINAWA has displays which introduce world culture to visitors.

6. Environmental conservation activities in JICA OIC

JICA OIC emphasizes on the environmental conservation activities such as energy saving, rubbish separation and recycling etc. Participants are kindly requested to cooperate to these activities during their stay at JICA OIC. Details will be given on arrival to JICA OIC.

7. For your Information

Information of Okinawa is available at following URLs.

- 1) Homepage of Urasoe city (where JICA OIC is located)

 Urasoecity: http://www.city.urasoe.lg.jp/archive/8761234/kokusai/english/index.html

 Basic information of Urasoe city is covered in English.
- 2) HP of Okinawa Prefecture: http://www.pref.okinawa.jp/english/index.html
 Basic information of Okinawa prefecture is covered (Urasoe city is one of the municipalities of Okinawa prefecture) in English.
- 3) HP of Okinawa Convention & Visitors Bureau: http://www.ocvb.or.jp/en/

More information is available at the reception of JICA OIC.

VI. ANNEX:

Please fill out the Forms attached as ANNEX1 and ANNEX2, and submit them along with the filled Application Form (or the filled Form A2A3).

ANNEX 1

APPLICANT'S PROFESSIONAL EXPERIENCE IN THE ICT FIELD

ANNEX 2

COUNTRY REPORT

Applicants are required to typewrite the ANNEX1 and ANNEX2. There are many applicants disqualified from the selection because of the illegibility of these documents.

ANNEX 1

APPLICANT'S PROFESSIONAL EXPERIENCE IN THE ICT FIELD

You are requested to describe your experience in the ICT field. <u>Please carefully read questions and fill in the blanks with your answers as much precise as possible.</u> Please note that collected information will be used for the evaluation and selection of your application.

Course Name: "Building Reliable Information	ourse Name: "Building Reliable Information System for the shift towards e-government (D		
		<u>(J14-04240)</u>	
Surname		Given name	
Applicant's Name: "		44	

1. Experience in the ICT Field

How long and what type of ICT work have you been involved until now (multiple choice is possible) in a business context? Please select the job type(s), which is/are closer to your past ICT experiences using the table below.

Job Classification	Job Description		Duration
Chief Information Officer	Top management level. Defining, planning and leading the implementation of Organization's IT strategy and reform		Year(s)
ICT Division Manager	Senior management le	evel. Leading an ICT Division/Section	Year(s)
ICT Project Manager	Coordinating every as	pect of the ICT system project from concept to delivery	Year(s)
System Analyst	Analyzing current sys	tems, identifying issues and planning new system developments	Year(s)
IT Architect	Analyzing business ar	nd designing architecture of ICT System	Year(s)
Application Consciolist	Design	Designing application programs	Year(s)
Application Specialist	Coding and test	Coding and testing application programs	Year(s)
	Design	Designing networks	Year(s)
Network Specialist	Administration and Maintenance	Administrating and maintaining networks	Year(s)
	Design	Designing database	Year(s)
Database Specialist	Administration and Maintenance	Administrating and maintaining database	Year(s)
Convity Consistint	Design	Designing security policies and measures	Year(s)
Security Specialist	Administration	Administrating security policies and measures	Year(s)
System Administrator	Administration Administrating information processing systems		Year(s)
System Operator	Operating information processing systems		Year(s)
Instructor	Conducting training courses in the field of ICT		Year(s)
Data Entry	Data Entry for information processing systems		Year(s)
Other (if any) :			Year(s)

2. Information Security Experience

By filling in the table below, please evaluate your knowledge and experiences about different types of IT architect in a business context from 1 to 4:

- 1. No experience at all or never heard of it
- 2. I have learnt about it but have not had an opportunity to practice it
- 3. I can accomplish it with some technical assistance
- 4. I can accomplish it all by myself

		Self-Evaluation (1-4)
Information	1.Risk Management	
Security	2.Security Policy Management	
	3.Organizing Information Security	
	4.Asset Management and Protection	
	5.Human Resources Security	
	6.Physical and Environment Security	
	7.Communications and Operations Management	
	8.Access Control	
	9.Information Systems Acquisition, Development, and	
	Maintenance	
	10.Infomation Security Incident Management	
	11.Disaster Recovery Management	
	12.Compliance	
	13. Others ()	

3. Programming Language Experience

By filling in the table below, please evaluate your knowledge and experiences about different types of programming languages in a business context from 1 to 4:

- 1. No experience at all or never heard of it
- 2. I have learnt about it but have not had an opportunity to practice it
- 3. I can create a program using this language but may need technical support
- 4. I can create a program and perform complex tasks using this language all by myself

		Self-Evaluation (1-4)
Programming	1. C / C++ / C#	
Language	2. Basic / Visual Basic / Visual Basic .NET	
	3. Java	
	4. PHP	
	5.Others()	

4. Database Experience

By filling in the table below, please evaluate your knowledge and experiences about different types of database operation system in a business context from 1 to 4:

- 1. No experience at all or never heard of it
- 2. I have learnt about it but have not had an opportunity to practice it
- 3. I can design/develop a database using this system but may need technical support
- 4. I can use and perform complex tasks using this system all by myself

	Self Evaluation (1-4)
1. Oracle	
2. PostgreSQL	
3. MySQL	
4. Microsoft SQL Server	
5. Others ()	

5. Network Experience

By filling in the table below, please evaluate your knowledge and experiences about different types of network related products in a business context from 1 to 4:

- 1. No experience at all or never heard of it
- 2. I have learnt about it but have not had an opportunity to practice it
- 3. I can design/develop a network using this product but may need technical support
- 4. I can use and perform complex tasks using this product all by myself

	Self evaluation (1-4)
Client Configuration/Administration	
2. DHCP Server Configuration/Administration	
3. Windows Domain Server Configuration/Administration	
4. NFS/NIS server Configuration/Administration	
5. Windows File share Sever Configuration/Administration	
6. Web server Configuration/Administration	
7. Mail server Configuration/Administration	
8. DNS server Configuration/Administration	
9. Proxy server Configuration/Administration	
10.Router Configuration/Administration	
11. Switching HUB Configuration/Administration	
12. Firewall Configuration/Administration	
13. SNMP Manager Administration	

6. Operating System and Office Software Suite Experience

- 1) By filling in the table below, please indicate your knowledge and experiences in the area of operation system and office software in a business context from 1 to 4:
 - 1. No experience at all or never heard of it
 - 2. I have learnt about it but have not had an opportunity to practice it
 - 3. I can use it but may need technical support
 - 4. I can use and perform complex tasks

	Self Evaluation (1-4)
1. Unix	
2. Linux	
3. Windows Client OS (i.e. XP, Vista, 7)	
4. Windows Server OS (i.e. Windows Server 2003, 2008)	
5. Others (

2) What kind of office software can you use?

	Fill in the version
1. Microsoft Word	
2. Microsoft Excel	
3. Microsoft Power Point	
4. Others (

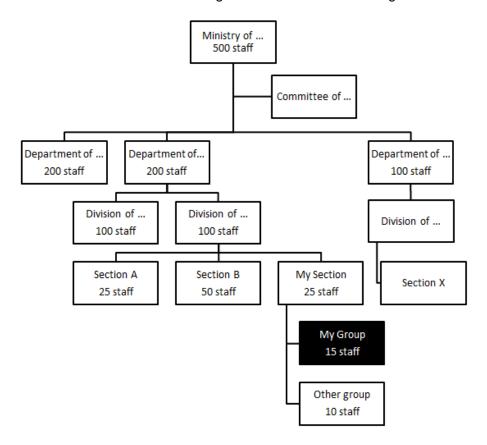

7. Configuration of the Information Processing System in your organization

Please describe information you have, if any, on the information processing system including hardware and software (packages and application programs) in your organization.

		Number of	Remarks	
		hardware		
	Windows File share		os ()	
	DHCP		OS ()	
	Windows Domain		OS ()	
	DNS		OS ()	
	NA=:I		OS ()	
	Mail		Software ()	
Server	Web		OS ()	
Server	vveb		Software ()	
	Proxy		OS ()	
	Floxy		Software ()	
	NFS/NIS		OS ()	
	Application		OS ()	
			Software ()	
	Database		OS ()	
	Database		RDBMS (
			OS ()	
Client			Software (
			Others ()	
	1. Router		Product Name ()	
Networking	2. Switching HUB		Product Name ()	
	3. Firewall		Product Name ()	
	X. Others		Product Name ()	
Internet	Network Service		Telephone line / ISDN / leased line / DSL	
HILEHIEL	Line Speed		bps	

8. Your organization's structure

1) Referring to the example, please attach the organization chart by highlighting your department/division/section and showing the number of staff working in each unit.

2) Please complement the organization chart by filling in the table below.

Explanation	Organization Name	Total number of
		personnel
Name of ministry or the		
highest level organization to		
which your organization		
belongs.		
If there are any organizations between the above and yours, please indicate by the order of hierarchy.	1.	
	2.	
	3.	
Name of your organization		
If there are any organizations	1.	
under yours, please indicate by	2.	
the order of hierarchy.	3.	

9.	_	?	of the training course e, is your current work assignment envisaged to	o be changed
	assignment	•	sks that would be newly/supplementary added be assigned to a completely different new po	•
	New tasks to	be added in addition to your c	current work assignment	
	New job title	(if it is applicable)		
10	Referring to in tackling	the business issue(s) that face	interest d in Page 6-11, what would be the most import es your organization? By filling in the table be that subject can resolve the issue.	• • • •
	Priority	Course subject	Motif of your choice (why this subject can contribute to resolve your organization's business issue?)	
	1st:			
	2nd:			
	3rd:			

4th:

11. Action Plan

This training program falls into one of JICA's training categories "<u>SOLUTION CREATION TRAINING</u>". Such program aims to facilitate solving problems in organizations by enabling the participants to acquire necessary knowledge and skills, which can address innovative solutions.

The creation of Action Plan therefore constitutes a core of this training course especially because it defies the roadmap to solve organization's business issues.

In this context, please describe business problems that your organization is interested in addressing within the framework of this training course. Some of those can be the scope of your future Action Plan.

	Business problems that should be addressed	Reason why your organization is interested in solving the problem	Proposed solutions

ANNEX 2

COUNTRY REPORT

Please describe in detail as much as possible. This report aims to better understand the level of your country's and government's approach to ICT deployment including e-government.

Course Name: "Buil	lding Reliable Inform	nation System for the	shift towards e-govern	ment (D)"
		(<u>J14-04240)</u>	
Applicant's Name: <u>'</u>	Surname	Given name		"
rippiicuit 3 i vaiie.				
National E-governme (For improving citizent)		ntegrating ICT solutions	in government work, etc.)	
(1) Name of the policy				
(2) Loading organization is	n the policy implements:	tion within government	ministries and institutions	
(2) Leading organization i	in the poncy implemental	tion within government	ministries and institutions	
(3) Background and the ou	utline of the policy rent issues, solutions, sco	pe, implementation plan	as and stakeholders, etc.)	

2. National ICT Policy/Vision

(universal access to ICT, private sector development, E-learning or E-agriculture, etc.)

(1) Name of the ICT policy/vision			
(2) Leading organization in promoting ICT policy/vision within government ministries and institutions			
(3) Background			
Overview of ICT usage in your country			
Total yearly sales of ICT industry (US\$): (including foreign companies)			
Percentage of the domestic IT industry's yearly sales (US\$)			
Benchmark data on ICT usage used for the ICT policy/vision			
(4) Outline of the policy (overarching objectives, target; scope, stakeholders and implementation plans, etc.)			

For Your Reference

JICA and Capacity Development

The key concept underpinning JICA operations since its establishment in 1974 has been the conviction that "capacity development" is central to the socioeconomic development of any country, regardless of the specific operational scheme one may be undertaking, i.e. expert assignments, development projects, development study projects, training programs, JOCV programs, etc.

Within this wide range of programs, Training Programs have long occupied an important place in JICA operations. Conducted in Japan, they provide partner countries with opportunities to acquire practical knowledge accumulated in Japanese society. Participants dispatched by partner countries might find useful knowledge and re-create their own knowledge for enhancement of their own capacity or that of the organization and society to which they belong.

About 460 pre-organized programs cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs and are being customized to address the specific needs of different target organizations, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

Japanese Development Experience

Japan was the first non-Western country to successfully modernize its society and industrialize its economy. At the core of this process, which started more than 140 years ago, was the "adopt and adapt" concept by which a wide range of appropriate skills and knowledge have been imported from developed countries; these skills and knowledge have been adapted and/or improved using local skills, knowledge and initiatives. They finally became internalized in Japanese society to suit its local needs and conditions.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from this "adoption and adaptation" process, which, of course, has been accompanied by countless failures and errors behind the success stories. We presume that such experiences, both successful and unsuccessful, will be useful to our partners who are trying to address the challenges currently faced by developing countries.

However, it is rather challenging to share with our partners this whole body of Japan's developmental experience. This difficulty has to do, in part, with the challenge of explaining a body of "tacit knowledge," a type of knowledge that cannot fully be expressed in words or numbers. Adding to this difficulty are the social and cultural systems of Japan that vastly differ from those of other Western industrialized countries, and hence still remain unfamiliar to many partner countries. Simply stated, coming to Japan might be one way of overcoming such a cultural gap.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.

CORRESPONDENCE

For enquiries and further information, please contact the JICA office or the Embassy of Japan. Further, address correspondence to:
