<Type: Solution Creation / 類型: 課題解決促進型>

NO. J12-00724 / ID. 1280718

Phases in Japan: From October 8, 2012 to November 10, 2012

(Whole Program From August 2012 to April 2013)

This information pertains to one of the Training and Dialogue Programs of the Japan International Cooperation Agency (JICA), which shall be implemented as part of the Official Development Assistance of the Government of Japan based on bilateral agreement between both Governments.

I. Concept:

Background

The rapid progress of industrialization in developing countries has been leading to economic development whereas negative aspects such as industrial accidents have been emerging. According to ILO, the number of victims of industrial accidents and diseases has exceeded over two millions annually in the world. Therefore, it is urgently required to formulate and implement appropriate policies of industrial safety and health in many countries. When we examine changes in frequency rate (Internationally applicable expression mode for accident occurrence rate resolved by ILO, namely the number of accident per one million cumulative working hours) of industrial accidents in Japan, it was over 20 in mid 1950s. However, the rate has drastically dropped to 1.7-1.8 in recent years, which accounts for less than 1/10 of that of mid 1950s. This drastic change was realized by Five Year Industrial Accident Prevention Plan which started in 1958, execution of Law for Industrial Accident Prevention Organizations which was put in force in 1964, establishment of industrial accident prevention organizations based on the law, and improvement of the systems by administration such as enforcement of industrial safety and health related law in 1972 as well as improvement and enhancement of countermeasures for industrial accident prevention.

It is no exaggeration to say that the current situation of industrial safety and health in Japan has attained the highest level in the world.

With this as background, JICA together with the Japan Industrial Safety and Health Association (JISHA), have organized the Seminar on Policy Improvement of Industrial Safety and Health to introduce Japanese experience in this field containing autonomous efforts made by Japanese companies as well as the establishment and enforcement of laws and regulations.

The main purpose of this seminar is to introduce history and policy of industrial safety and health in Japan to developing countries, especially to the countries where industrialization has been progressing and to contribute to the improvement of policies of industrial safety and health of target countries.

For what?

This program aims to provide participants with the opportunities to acquire necessary knowledge and skills to improve their countries' policy for industrial safety and health by learning Japanese cases.

For whom?

This program is offered to the Governmental/Non-Governmental organizations in charge of planning and administration of industrial/occupational safety and health policy.

How?

By lectures, practices, and site visits. Participants will also be requested to formulate an action plan. Action plan has two purposes. The first purpose is that participants know the actual Occupational Safety and Health(OSH) situation/problems of their own countries by comparing with that of Japan or through discussion and exchange of opinions with other participants after recognizing Japanese situation. The second purpose is that participants have clearer image of their goal and think about feasible methods to realize it.

JICA and Capacity Development

The key concept underpinning JICA operations since its establishment in 1974 has been the conviction that “capacity development” is central to the socioeconomic development of any country, regardless of the specific operational scheme one may be undertaking, i.e. expert assignments, development projects, development study projects, training programs, JOCV programs, etc.

Within this wide range of programs, Training Programs have long occupied an important place in JICA operations. Conducted in Japan, they provide partner countries with opportunities to acquire practical knowledge accumulated in Japanese society. Participants dispatched by partner countries might find useful knowledge and re-create their own knowledge for enhancement of their own capacity or that of the organization and society to which they belong.

About 460 pre-organized programs cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs are being customized to address the specific needs of different target organizations, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

Japanese Development Experience

Japan was the first non-Western country to successfully modernize its society and industrialize its economy. At the core of this process, which started more than 140 years ago, was the “*adopt and adapt*” concept by which a wide range of appropriate skills and knowledge have been imported from developed countries; these skills and knowledge have been adapted and/or improved using local skills, knowledge and initiatives. They finally became internalized in Japanese society to suit its local needs and conditions.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from this “*adoption and adaptation*” process, which, of course, has been accompanied by countless failures and errors behind the success stories. We presume that such experiences, both successful and unsuccessful, will be useful to our partners who are trying to address the challenges currently faced by developing countries.

However, it is rather challenging to share with our partners this whole body of Japan’s developmental experience. This difficulty has to do, in part, with the challenge of explaining a body of “tacit knowledge,” a type of knowledge that cannot fully be expressed in words or numbers. Adding to this difficulty are the social and cultural systems of Japan that vastly differ from those of other Western industrialized countries, and hence still remain unfamiliar to many partner countries. Simply stated, coming to Japan might be one way of overcoming such a cultural gap.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the

disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.

Guidelines of Application Form for the JICA Training and Dialogue Program

The attached form is to be used to apply for the training and dialogue programs of the Japan International Cooperation Agency (JICA), which are implemented as part of the Official Development Assistance Program of the Government of Japan. Please complete the application form while referring to the following and consult with the respective country's JICA Office - or the Embassy of Japan if the former is not available - in your country for further information.

1. Parts of Application Form to be completed

1) Which part of the form should be submitted?

It depends on the type of training and dialogue program you are applying for.

>Application for Group and Region Focused Training Program

Official application and Parts A and B including Medical History and Examination must be submitted.

>>Application for Country Focused Training Program including Counterpart Training Program

Part B including Medical History and Examination will be submitted. Official application and Part A need not to be submitted

2) How many parts does the Application Form consist of?

The Application Form consists of three parts as follows;

Official Application

This part is to be confirmed and signed by the head of the relevant department/division of the organization which is applying.

Part A. Information on the Applying Organization

This part is to be confirmed by the head of the relevant department/division of the organization which is applying.

Part B. Information About the Nominee including Medical History and Examination

This part is to be completed by the person who is nominated by the organization applying. The applicants for Group and Region Focused Training Program are required to fill in every item. As for the applications for Country Focused Training Program including Counterpart Training Program and some specified International Dialogue Programs, it is required to fill in the designated "**required**" items as is shown on the Form.

Please refer to the General Information to find out which type the training and dialogue program that your organization applies for belongs to.

2. How to complete the Application Form

In completing the application form, please be advised to:

- (a) carefully read the General Information (GI) for which you intend to apply, and confirm if the objectives and contents are relevant to yours,
