I. Concept

Background

In many cities in the world we have seen drastic population growth and economic expansion induced by industrialization and urbanization for the past several decades. The rapid growth has also brought about an expansion of demands in the transport sector, but many of the cities have been developed without well-designed appropriate plans, resulting in serious delays in the development of the required infrastructure and the provision of public services. As a result, many cities have been seriously affected by various socio-economic and environmental problems relating to transport. These range from air pollution, public health, noise pollution and traffic congestion caused by automobiles to the subsequent economic losses such as inefficient use of energy and loss of potential natural habitats and land resources.

The growth of the transport demands is indispensable in the context of socio-economy. However, the concept of environmentally sustainable transportation (hereinafter referred to as 'EST') is that such a growth must be achieved in harmony with environmental conservation and protection, and in this respect EST is regarded as transport system which meets the needs of the present without spoiling the needs of the future generations.

Recognizing the importance of EST and the required actions to be taken at the national and international levels, the Japanese government, with cooperation from OECD, held the "International Conference on Environmentally Sustainable Transport in the Asia Region" in March 2003 in Nagoya city, where the concept of EST was introduced to Japan and other Asian countries. This was followed by the "Manila Policy Dialogue on Environment and Transport in the Asian Region", held in January, 2004 in Manila, Philippines, and participating countries were encouraged to take concrete steps towards the promotion of EST. The Manila Statement, adopted by the participants at the conference, called for (a) the formulation of National EST Strategies-cum-Action-Plans, and (b) the establishment of a Regional EST Forum and subsidiary expert groups.

In line with Manila Statement, in 1-2 August 2005, the 1st meeting of the Regional EST Forum in Asia was held in Nagoya, Aichi pref. as the EXPO affiliated program. The Aichi Statement, which officially launched the Regional EST Forum, was adopted in the meeting, calling for (a) integrated formulation and implementation of policies, strategies and programs in both national and regional levels in 12 thematic areas such as public health (b) promotion of cooperation among international organizations, experts, NGO, Civil Societies and all other stakeholders. UNCRD was asked to be a facilitator to coordinate them.

In the recent years, soaring prices of natural resources such as crude oil all over the world has disrupted the world economy, and it was one of the key issues on the

agenda at the Hokkaido G8 Summit held in July 2008. Combined with the prevention of global warming, it is considered to be increasingly important to develop such eco-friendly transport systems by restraining the use of automobiles and encouraging instead the use of public transport systems.

With these backgrounds, JICA has implemented the training program on the theme of urban environment and transport to build the capacity of officials in the field of urban environment and transportation since 2004 with the aim of increasing awareness and encouraging action to facilitate changeover to environment-friendly means of transport. In particular, the new program starting this year also aims to provide the participants with a better understanding of the concept of EST and a venue for sharing their ideas and experiences to incorporate the concept. The program also offers the participants an opportunity not only to learn from Japanese experiences but to exchange ideas, experiences, and technical expertise among the participants.

The program on EST, fiscal year 2010, is organized by Chubu International Center, one of the JICA regional centers located in Nagoya city, and implemented by United Nations Centre for Regional Development (UNCRD).

For what?

Environment-friendly EST is becoming increasingly important and considered as the future transport system in many countries. The program aims to raise awareness for its importance and to call for action to promote EST introduction with the initiatives of the governmental organizations related to urban transport and environment in the participating countries.

For whom?

This program is offered to mid-level administrative officials who belong to one of the following organizations; the environmental section in the Ministry of Transport, the transport section in the Ministry of Environment, or the relevant organizations.

How?

Participants will have opportunities to learn about various approaches and strategies to implement EST promotion in Japan. On the basis of the training program the participants will formulate an Action Plan describing what the participants will be doing after they return to home country. Two participants will be accepted per country each year for the next three (3) years, establishing and expanding a network of the participants for effective implementation of the final Action Plan, which is to be drafted, reviewed and finalized over a period of three years.

II. Description

1. **Title (J-No.):** Environmentally Sustainable Transportation (EST) (J1000844)
2. **Period of program:**

Duration of whole program:	June 2010 to November 2010
Preliminary Phase: (in a participant's home country)	June 5 to July 5, 2010
Core Phase in Japan:	July 5 to August 21, 2010
Finalization Phase: (in a participant's home country)	August 2010 to November 2010
3. **Target Regions or Countries:**
Philippines, Vietnam, India, Sri Lanka, Pakistan, Egypt
4. **Eligible / Target Organization**
This program is designed for the Department of Transport and the Department of Environment of central and local government, or the relevant organizations with jurisdiction over the urban transport or urban environment, with a particular concern about the promotion of environment and people-friendly transport system. We positively accept nominees come with combination of two participants, one each from Environment and Transportation divisions.

7. **Program Objective:**
Policies formulated for solution development to promote EST shall be approved at the respective participating organizations, and the policies shall be proposed to the Ministry of Transport, the Ministry of Environment or the relevant organizations and authorities in their own countries.
Within three (3) months after the completion of the third-year training program, participating organizations shall submit a Final Report, by which it is confirmed that the Action Plan for introduction of EST is proposed to their higher or relevant authorities and organizations in their own countries.
8. **Overall Goal:**
The policies, programs and projects to be formulated shall be implemented to develop EST effectively, leading to the capacity building and performance upgrading of those officials engaged in administration of transport system management and urban environment management.

9. Expected Module Output and Contents for 2nd Year:

This program consists of the following components. Details on each component are given below:

Preliminary Phase in a participant's home country (Before July 5, 2010) <i>Participating organizations make required preparation for the Program in the respective country.</i>		
Expected Module Output	Activities	
Module 1: Review and analysis of the current situation and issues of EST and the draft Action Plan which was submitted in the 1 st year	<ul style="list-style-type: none"> • Preparing the Job/Inception Report, summarizing the review and analysis of 1) the current situation and problems related to urban transport and environment and 2) the draft Action Plan of EST • Presentation of the Job/Inception Report • Identifying the issues of their own countries through discussions 	
Core Phase in Japan (July 5 to August 21, 2010) <i>Participants dispatched by the organizations attend the Program implemented in Japan.</i>		
Expected Module Output	Subjects/Agendas	Methodology
Module 2: Identifying the direction and extension methods of policies, programs and projects for EST promotion, referring to Japan's Cases	<ul style="list-style-type: none"> • Administration in Japan • Urban environment and transport, and introduction of EST concept • International Initiatives and programs • Land use and transport planning • TDM, NMT, LRT • Aichi New-Generation Automobile Strategies • Intelligent Transport System (ITS) • Environment and people-friendly urban transport infrastructure • Urban environment and transport policies in Japan • Compensation system for health damage caused by public pollution • Environment assessment • Clean fuels suitable to automobiles • Financial measures to promote EST 	Lecture Field visit Discussion
Module 3: Considering and analyzing of the issues of the current Action Plan	Identifying the issues and key points for EST promotion and considering and analyzing of the issues of the current Action Plan through exercises and discussions	Exercise Discussion
Module 4: Drafting of a principal Action Plan	Drafting a principal Action Plan on the priority issues through exercises and discussions	Exercise Discussion

Finalization Phase in a participant's home country
Participating organizations produce final outputs by making use of results brought back by participants. This phase marks the end of the Program in 2nd year.

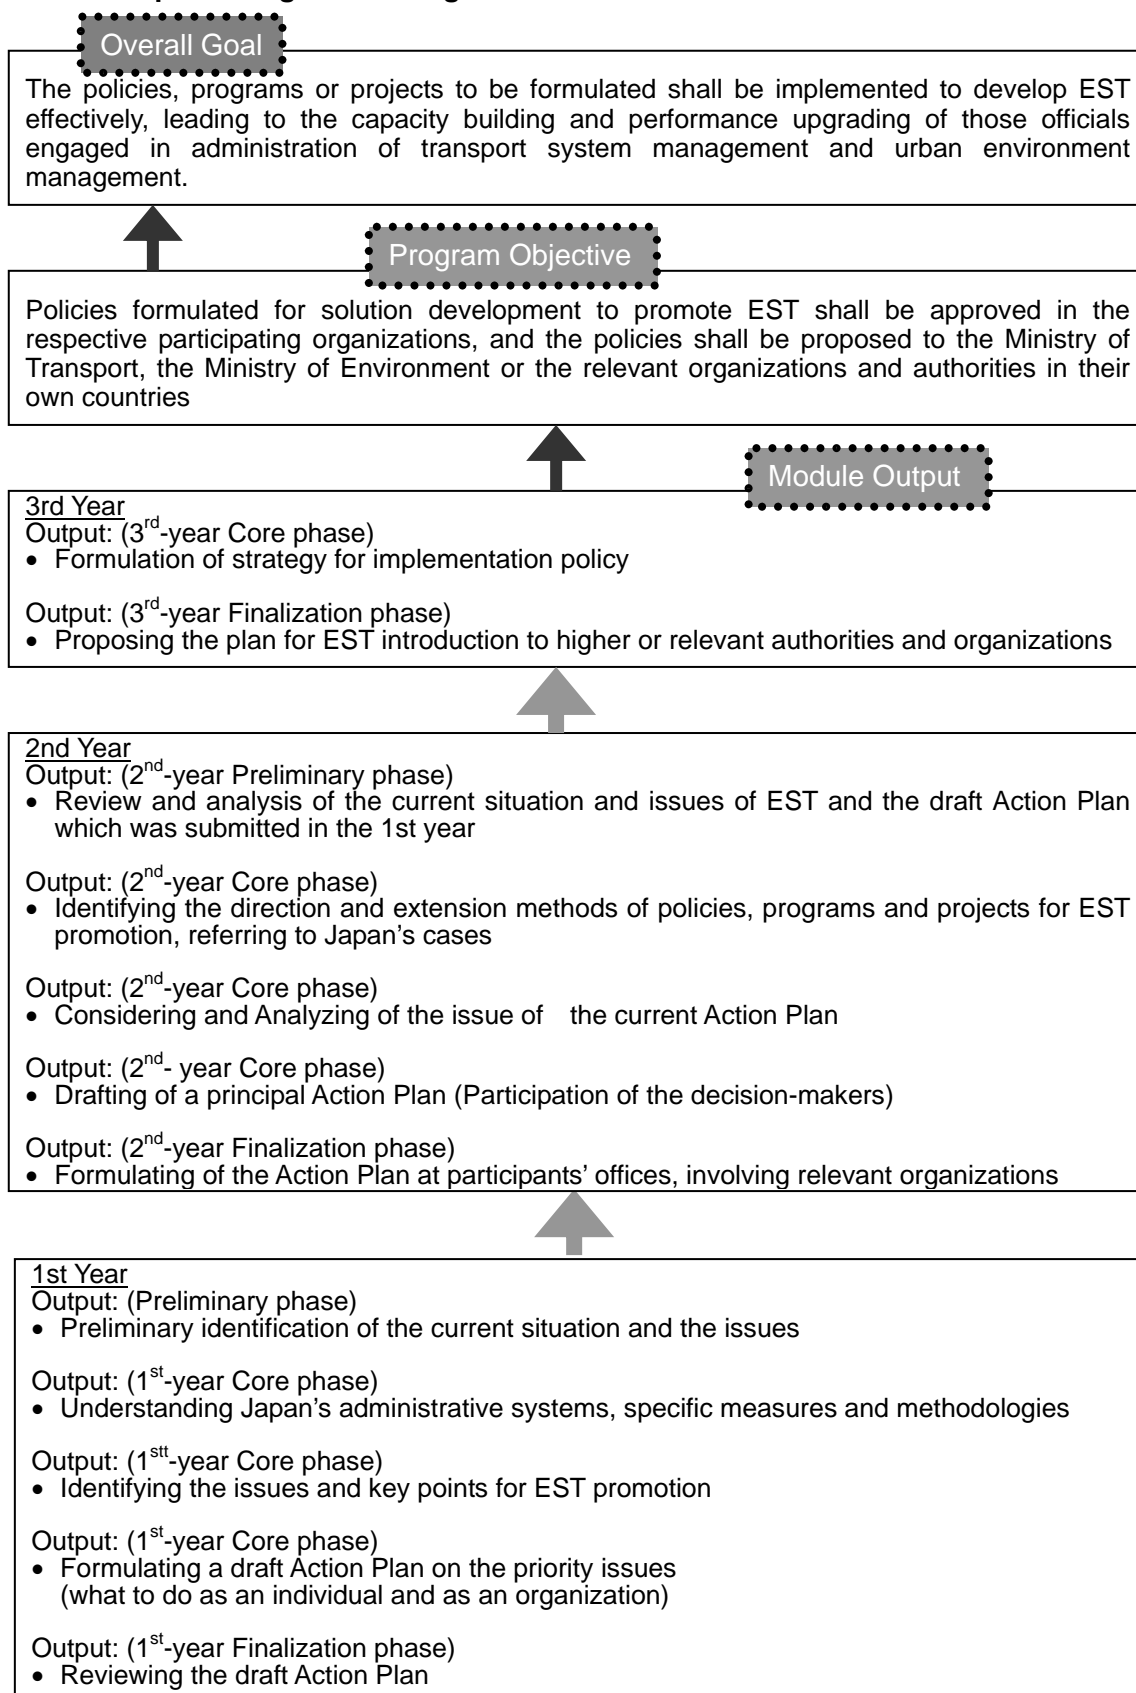

Expected Module Output	Activities
Module 5: Formulating of the Action Plan at participants' offices, involving relevant organizations	Review and formulating the principal Action Plan (an Interim Report) at participants' offices, involving relevant organizations in the participant's country by November, 2010. Submission of the Completion Report (sample at the Annex 2 on page 19) together with your reviewed principal Action Plan to the respective country's JICA office in your country.

A pre-departure orientation will be held at the respective country's JICA office (or Japanese Embassy), to provide participants with details on travel to Japan, conditions of the workshop, and other matters.

V. Other Information

Development Education and Exchange with Local Communities:

For the promotion of mutual friendship, JICA Chubu encourages international exchange between the JICA participants and local communities including students as a part of development education program. You are expected to contribute by attending such activities and will possibly be asked to introduce the society, economy and culture of your home country. The participant's ethnic costume on such exchange programs will be highly welcomed by school children as well as local residents.

GUIDELINES FOR INCEPTION REPORT

All participants are requested to prepare Inception Report, which explains specific urban environment problems caused by transportation, their countermeasures, and constraints dealt by your organization. The Inception Report should be typewritten in Times New Roman font (12 point font) and single-spaced lines and submitted together with the Nomination Form (Form A2A3). The Inception Report is used for screening applicants; therefore, the applications without it will not be accepted.

Please indicate the following on the cover page.

- Name of country
- Name of participant
- Name of organization

Contents to be reported as follows:

Description of the environmental problem specially caused by traffic pollution in your country.

1. Describe the following with available documents or statistical data.
 - (1) Environmental trends and conditions associated with transport sector (since last 10 years)
 - (2) Driving forces/causes of such environmental problems in the transport sector
 - (3) Existing policy initiatives/measures at different level (Govt., NGOs, and others)
 - (4) Policy/knowledge/information gap in relation to environment and the transport sector
2. Description of the present situation of transport infrastructure in your country
 - (1) Present situation of traffic action
 - (2) Difficulties/challenges in promoting environmental-friendly transportation/infrastructures
3. Long/Short-term Strategy of your organization on urban environment and transportation
 - (1) Overall strategy of your country
 - (2) How your organization is contributing towards achieving/meeting the overall national strategy
4. Achievement goals in connection with your role while you are in Japan
Describe specific goals you would like to achieve while you are in Japan. The goals are to be connected with your role/duties.

5. Expectations to the applicant from the applicant's director or head of department (This is a section that the applicant's director or head of department fills in. Please include the director's name and position.)

Note:

The participant, who has had the training in Japan, should report on the training program to organization, which the participant belongs to. The information and his / her Action Plan (Interim Report) reported by the participant shall be shared among the organization and the line to introduce EST in your country should be examined. The participant is obliged to make and submit a Final Report, which describes the progress in realizing the Action Plan (Interim Report) and a draft of policies / programs / projects to introduce EST to your country with the commitment of your organization, to JICA Chubu three (3) months after the participant returned to home. (See Finalization Phase on page 6) Please write your expectations to the applicant taking the obligation into consideration.

GUIDE FOR FORMULATING A FINAL REPORT

As post-training actions to be taken, participants will disseminate what was learned from this EST Training Course to their own organization (supervisors, colleagues and subordinates) and related organization(s). Each participant is requested to make and submit a final report on these activities to JICA Chubu. The final report should cover the following items:

PART 1: Dissemination of what you had learned from this EST Training Course.

Please cover all of the following items in your final report.

1. Report to your supervisor, colleagues, and subordinates

Please specify the following information:

- Date
- Name and position of your supervisor
- Comments from your supervisor, colleagues, and subordinates

*If could not, please specify the reason why.

2. Report to other relevant department(s)/organization(s)

Please specify the following information.

- Date
- Name of department(s)
- Comments from them

*If could not, please specify the reason why.

3. Informal discussion with colleagues and subordinates

Please specify the following information.

- Date
- Names and positions of your colleagues and subordinates
- Comments from them

*If could not, please specify the reason why.

4. Organization of a seminar/workshop in your organization with/without inviting other relevant department(s)/organization(s) and/or local community/residents

Please specify the following information.

- Date
- Venue
- List of audience
- Contents of your presentation
- Questions & answers
- Comments from your organization, other relevant

department(s)/organization(s) and/or local community/residents

- Materials that are subscribed to the audience (If any)

*If could not, please specify the reason why.

5. Dissemination of EST Training Course materials

Please specify the following information.

- Comments on EST Training Course materials from your office

*If could not, please specify the reason why.

PART 2: Action Plan

Please cover all of the following items in your final report.

1. Submission of your action plan to your supervisor

Please specify the following information.

- Date
- Name and position of your supervisor
- Questions & answers
- Comments from your supervisor

2. Making presentation on your action plan in your department

Please specify the following information.

- Date
- Names and positions of your colleagues and subordinates in your department
- Questions & answers
- Comments from them

3. Discussion with your supervisor and colleagues about your action plan

Please specify the following information.

- Date

JICA and Capacity Development

The key concept underpinning JICA operations since its establishment in 1974 has been the conviction that “capacity development” is central to the socioeconomic development of any country, regardless of the specific operational scheme one may be undertaking, i.e. expert assignments, development projects, development study projects, training programs, JOCV programs, etc.

Within this wide range of programs, Training Programs have long occupied an important place in JICA operations. Conducted in Japan, they provide partner countries with opportunities to acquire practical knowledge accumulated in Japanese society. Participants dispatched by partner countries might find useful knowledge and re-create their own knowledge for enhancement of their own capacity or that of the organization and society to which they belong.

About 460 pre-organized programs cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs are being customized to address the specific needs of different target organizations, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

Japanese Development Experience

Japan was the first non-Western country to successfully modernize its society and industrialize its economy. At the core of this process, which started more than 140 years ago, was the “*adopt and adapt*” concept by which a wide range of appropriate skills and knowledge have been imported from developed countries; these skills and knowledge have been adapted and/or improved using local skills, knowledge and initiatives. They finally became internalized in Japanese society to suit its local needs and conditions.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from this “*adoption and adaptation*” process, which, of program, has been accompanied by countless failures and errors behind the success stories. We presume that such experiences, both successful and unsuccessful, will be useful to our partners who are trying to address the challenges currently faced by developing countries.

However, it is rather challenging to share with our partners this whole body of Japan’s developmental experience. This difficulty has to do, in part, with the challenge of explaining a body of “tacit knowledge,” a type of knowledge that cannot fully be expressed in words or numbers. Adding to this difficulty are the social and cultural systems of Japan that vastly differ from those of other Western industrialized countries, and hence still remain unfamiliar to many partner countries. Simply stated, coming to Japan might be one way of overcoming such a cultural gap.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.
