Department of Personnel & Training

North Block, New Delhi-1  
Dated the 3<sup>rd</sup> May 2010.

**TRAINING CIRCULAR**

**Subject:** A Group Training Course in Information Management Technology for Land Use and Natural Resources Analysis to be held in Japan from 16<sup>th</sup> August, 2010 to 23<sup>rd</sup> September 2010 (Core Phase).

The undersigned is directed to state that the Japan International Cooperation Agency (JICA), under the Technical Cooperation Programme of the Government of Japan has invited applications for the above programme. The total duration of the programme is from June 2010 to December 2010, out of this, the Core Phase, from 16<sup>th</sup> August 2010 to 23<sup>rd</sup> September 2010 will be held in Japan. The Preliminary Phase and the Finalization Phase will be held in the candidate's home country. The details of the programme and the application form may be drawn from Ministry of Personnel, Public Grievances and Pensions website (persmin.nic.in).

2. The programme is designed for universities, research institutions and central and/or local governments in the fields of land use and/or sustainable management of natural resources. It aims for the participants to utilize free and open-source software GIS (FOSS-GIS), GRASS in their work, and share the technology in their institutions.

3. The candidate should be :

- a) University staff or institute researcher in the field of agricultural and/or environmental sciences who is engaged in teaching or research on information management technology for land use and natural resources analysis or
- b) officials who are engaged in policy-making for information management technology for land use and natural resources analysis at the central or local governments; have 5 years experience;

The candidates are required to :

1. have experiences of using at least proprietary GIS software,
2. but not necessarily well-experienced experts of GIS and
3. be in a position to disseminate GIS technology at/in their respective offices/countries;

have at least an elementary level of ability of using personal computers; be a University Graduate; be proficient at written and spoken English; be in good health, both physically and mentally to undergo the training; not be serving in the military and be under forty years of age.

4. The fellowship award covers a Round-trip air ticket between an international airport designated by the JICA and Japan; travel insurance from the time of arrival in Japan to departure from Japan; allowances for (accommodation, living expenses, outfit and shipping); expenses for JICA study tours and free medical care for participants who may fall ill after reaching Japan. The participants are not allowed to take any family member during the training course.

.....Contd/-

5. It is requested that the nomination of the suitable candidates may please be forwarded to this Department in accordance with the eligibility criteria and the terms and conditions of the JICA's Circular dated 26<sup>th</sup> April 2010. The Ministry/State Governments may sponsor the names of only Government/ Public Sector Undertaking functionary.

6. The nomination details should be submitted in the JICA's prescribed proformas (A2A3 Forms) duly authenticated by the Department concerned alongwith the country report.

7. The applications should reach this Department through the Administrative Ministry/State Governments not later than 31<sup>st</sup> May 2010. Nominations received after the prescribed date will not be considered. The circular inviting applications for training courses is available on this Department's website persmin.nic.in

No. 33/GT-CP/2010

26<sup>th</sup> April, 2010

Dear Mr. Rakesh Mishra,

A. Group Training Course in Information Management Technology for Land Use and Natural Resources Analysis will be held in Japan from 16<sup>th</sup> August, 2010 to 23<sup>rd</sup> September, 2010 under the Technical Cooperation Programme of the Government of Japan.

We are forwarding herewith two copies of the General Information Booklet on the above offer. It is requested that the following documents of the selected candidate may please be submitted to this office by 4<sup>th</sup> June, 2010:-

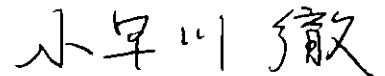

- (1) The Nomination Form A2A3 together with the medical history questionnaire,
- (2) The desired Country and Job Report
- (3) The filled in Questionnaire

Further details are available in the General Information Booklet. It may be noted that the completed Country and Job Report and Questionnaire are essential for screening of applications.

It is further informed that 6 slots are available globally for the above course and it would be much appreciated if you could take further necessary action and submit the nomination(s) of suitable candidate(s) to this office by the designated date.

With regards,

Yours sincerely,

  
(Toru Kobayakawa)  
Representative

# TRAINING AND DIALOGUE PROGRAMS

GENERAL INFORMATION ON

INFORMATION MANAGEMENT TECHNOLOGY FOR LAND USE  
AND NATURAL RESOURCES ANALYSIS

集団研修「土地利用と自然資源分析の情報管理技術」  
*JFY 2010*

<Type: Trainers Training / 類型: 人材育成普及型>

NO. J10-00825 / ID. 1080987

From June 2010 to December 2010

Phase in Japan: From Aug.16, 2010 to Sep. 23, 2010

This information pertains to one of the Training and Dialogue Programs of the Japan International Cooperation Agency (JICA), which shall be implemented as part of the Official Development Assistance of the Government of Japan based on bilateral agreement between both Governments.

# ***I. Concept***

## **Background**

In developing countries, environmental degradation in rural area is a serious problem. It is occurred by the increased needs in food production owing to the rapid population growth, and/or unstable agricultural production because of the climate change.

To tackle with this challenge to the environmental degradation, it is necessary to evaluate distribution and stockpile of natural resources, like land or forest, and to manage them in a sustainable way, and it is very important to monitor the current situation of land use and natural resources all the time. For this purpose, GIS (Geographic Information Systems) technology is highly useful because it allows to process and analyze satellite data and other data like, geography, map, climate, ...etc., at the same time, and it contributes to the rapid and high-accurate monitoring of wide area.

Free and Open Source Software GIS (FOSS-GIS) is well-known as highly useful software especially for the use in developing countries, because anyone can download it from internet and introduce it, without any initial cost.

JICA Chubu has conducted a technical training for past 10 years, to promote the introduction and distribution of FOSS-GIS technology for the sustainable management of natural resources and food production in the developing counties. Through this 10-years' experience, it is found that this technology is highly useful for the solution of global issues like food crisis and/or environmental problems, if the application area of this technology would be extended.

Against such a background, JICA Chubu revised the course, and added the perspective of land use to its scope. The renewed course starts from JFY 2010.

## **For what?**

This program aims to contribute to the improvement of quality and technology related with management of land use and natural resources in developing countries. In particular, it aims to introduce FOSS-GIS (Free and Open Source Software – Geographic Information Systems) to the management of land use and natural resources for reducing its managing cost.

## **For whom?**

This program is offered to university staffs or institute researchers in the field of agricultural sciences who are engaged in teaching or research on sustainable management of land use and/or natural resources, or officials who are engaged in policy-making for sustainable management of and use and/or natural resources at the central or local governments.

### **How?**

Participants shall have opportunities to learn basic theory, techniques and knowledge of GIS through lectures and practices. Participants will also have opportunity to visit many sites where GIS technology is practically utilized for the management of land use and/or natural resources. After these lectures, practices, observation trips, and discussions, participants will formulate an action plan describing what the participant will do after they go back to home countries putting the knowledge and ideas acquired and discussed in Japan among others into their on-going activities.

## ***II. Description***

**1. Title (J-No.): Information Management Technology for Land Use and Natural Resources Analysis (J1000825)**

**2. Period of program**

<b>Duration of whole program:</b>	June 2010 to December 2010
<b>Preliminary Phase:</b> (in a participant's home country)	June 26, 2010 to August 15, 2010
<b>Core Phase in Japan:</b>	August 16 to September 23, 2010
<b>Finalization Phase:</b> (in a participant's home country)	September 2010 to December 2010

**3. Target Regions or Countries**

Argentina, Cambodia, India, Tuvalu

**4. Eligible / Target Organization**

This program is designed for universities, research institutions and central and/or local governments in the fields of land use and/or sustainable management of natural resources

**5. Total Number of Participants**

6 participants

**6. Language to be used in this program:** English

**7. Program Objective:**

Participants will become to be able to utilize Free and Open-Source Software GIS (FOSS-GIS), GRASS, in their work and the technology will be shared in their institutions.

**8. Overall Goal:**

FOSS-GIS, GRASS, will be used for land use and natural resources monitoring and for estimation of distribution and/or the volume of land, water and forest resources, etc.

## 9. Expected Module Output and Contents:

This program consists of the following components. Details on each component are given below:

<p><b>(1) Preliminary Phase in a participant's home country</b>          (June 26, 2010 to August 15, 2010)          Participating organizations make required preparation for the Program in the respective country.</p>	
Expected Module Output	Activities
<p>Present status of land use and natural resources of his/her country will be clarified by pre-training activity and his/her subject for case study in Japan will be decided.</p>	<p>Formulation and submission of Inception Report (or country and job report)          Reading the specified papers and documents on FOSS4G          Search/Study: Job report and Country report</p>

<p><b>(2) Core Phase in Japan</b>          (August 16, 2010 to September 23, 2010)  <i>Participants dispatched by the organizations attend the Program implemented in Japan.</i></p>		
Expected Module Output	Subjects/Agendas	Methodology
<p>Module 1:          Basic theory and techniques of FOSS-GIS technology and remote sensing will be acquired by using GRASS.</p>	<ul style="list-style-type: none"> <li>• Lecture: Basic theory and techniques of FOSS-GIS technology and Remote Sensing</li> <li>• Practice: Install and use of GRASS, analysis of satellite data and graphic display by GRASS             <ul style="list-style-type: none"> <li>➤ LINUX+GRASS install</li> <li>➤ Remote sensing</li> <li>➤ Mapserver</li> </ul> </li> </ul>	<p>Lecture and Practice</p>
<p>Module 2:          Global positioning figures by GPS will be displayed on the map and analyzed by GRASS, then, techniques for data sharing through internet will be acquired by using Mapserver technology.</p>	<ul style="list-style-type: none"> <li>• Lecture: Basic theory and use of GPS and techniques of Mapserver</li> <li>• Practice: Use of GPS and analysis by GRASS. Obtaining data set and data sharing through internet             <ul style="list-style-type: none"> <li>➤ Google earth and GPS</li> <li>➤ Case studies</li> </ul> </li> </ul>	<p>Lecture and Practice</p>

<p>Module 3: GIS-applied studies in Japan will be taught and participants will work on their own projects as a case study to share the results among participants.</p>	<ul style="list-style-type: none"> <li>➤ Study: Good practices regarding to land use and natural resources management of Japan</li> <li>➤ Practice: Case study by each participant and data sharing of the results among participants</li> <li>➤ Others: Preparation of action plan</li> </ul> <ul style="list-style-type: none"> <li>• Map information-related business</li> <li>• GIS in agricultural land management in developing countries</li> <li>• Remote sensing in agriculture in Japan</li> <li>• GIS in environmental conservation</li> <li>• Construction of forest GIS and its application</li> <li>• Research on GIS use in natural resource management</li> </ul>	<p>Lecture Field Visit</p>
<p>Action plan (interim report) is formulated:</p>	<p>Presentation of Action Plan</p>	<p>Presentation Discussion</p>

**(3)Finalization Phase in a participant’s home country**

*Participating organizations produce final outputs by making use of results brought back by participants. This phase marks the end of the Program.*

Expected Module Output	Activities
<p>Action plan will be realized through his/her own use in work and dissemination to colleagues of his/her institutions and its results will be reported to JICA.</p>	<p>Application and implementation of the action plan (interim report) after going back to the participant’s country and submission of the Progress Report (see ANNEX ) by December 2010. Please submit the Completion Report form (sample in the Annex on page 19) together with your final product to JICA overseas office in your country.</p>

## <Structure of the program>

### (1) Preliminary phase (activities in home country)

Preparation for the country and job report presentation (please refer (2)-2) below).

### (2) Core Phase (activities in Japan)

#### 1) Course Orientation

Before the start of training, a course orientation will be held to provide a general explanation of the course.

#### 2) Country and Job Report Presentation

Country and Job Report Presentation is scheduled at the beginning of the course, which will be attended by lecturers and people concerned with this course. Time allocation for each presentation will be about 20 minutes, followed by a 10-minute question and answer session. To make presentations more understandable and attractive, the participants are advised to make effective use of visual references such as PowerPoint, photos, brochures and others.

#### 3) Technical Training

- Introduction to GIS for land use and natural resources analysis
- Basic Theory of GIS (I)  
Concept of GIS (Data Structure, How to generate GIS Data)
- How to manipulate the Linux-GRASS  
Construction of GIS system (GRASS-GUI and Commands operation)
- Basic theory of GIS (II)  
Generation of evaluation maps for land utilization by GRASS
- Basic theory of Remote Sensing and its application  
Data processing technology of Remote Sensing Data
- Spatial data sharing using Free and Open Source Software (FOSS)
- Case study
- Application of GPS to GIS - GPS with GRASS
- Application of GIS to land use and natural resources analysis
- Field visit

#### 4) Action Plan Presentation

The participants are required to prepare the Action Plan and present it at the Action Plan presentation meeting scheduled at the end of the program in Japan. The purpose of this presentation is to show what the participants find most interesting concerning this field in Japan and what can be possibly applied in participants' home countries. See ANNEX for details.

### (3) Finalization Phase (activities in home country)

Participants are expected to implement the action plan (interim report) and report on its progress within three (3) months after the end of the core phase in Japan. See ANNEX for details.

## 10. Follow-up Cooperation by JICA:

In this program, JICA might extend follow-up support to participating organizations that intend to develop the result of the project further. Please note that the support shall be extended selectively based on proposals from the participating organizations.

### ***III. Conditions and Procedures for Application***

#### **1. Expectations for the Participating Organizations:**

- (1) This program is designed primarily for organizations that intend to address specific issues or problems identified in their operation. Participating organizations are expected to use the project for those specific purposes.
- (2) This program is enriched with contents and facilitation schemes specially developed in collaboration with relevant prominent organizations in Japan. These special features enable the project to meet specific requirements of applying organizations and effectively facilitate them toward solutions for the issues and problems.
- (3) As this program is designed to facilitate organizations to come up with concrete solutions for their issues, participating organizations are expected to make due preparation before dispatching their participants to Japan by carrying out the activities of the Preliminary Phase described in section -9.
- (4) Participating organizations are also expected to make the best use of the results achieved by their participants in Japan by carrying out the activities of the Finalization Phase described in section -9.

#### **2. Nominee Qualifications:**

Applying Organizations are expected to select nominees who meet the following qualifications.

##### **(1) Essential Qualifications**

- 1) Nominees should be nominated by their Government in accordance with procedures mentioned in the III-4 below.
- 2) They should belong to one of the following target groups with over 5 years of experience;
  - a) University staff or institute researcher in the field of agricultural and/or environmental sciences who is engaged in teaching or research on information management technology for land use and natural resources analysis or
  - b) Officials who are engaged in policy-making for information management technology for land use and natural resources analysis at the central or local governments.
- 3) They are required to;
  - 1) have experiences of using at least proprietary GIS software,
  - 2) but not necessarily well-experienced experts of GIS, and
  - 3) be in a position to disseminate GIS technology at/in their respective offices/countries.
- 4) Computer Skill: have at least an elementary level of ability of using personal computers.

- 5) Educational Background: be a graduate of university
- 6) Language: have a sufficient command of spoken and written English. Please attach an official certificate for English ability such as TOEFL, TOEIC etc, if available.
- 7) Health: must be in good health, both physically and mentally, to participate in the Program in Japan.

Pregnancy : Pregnant participants are strictly requested to complete the required procedures before departure in order to minimize the risk for their health. The procedures include letter of the participant's consent to bear economic and physical risks letter of consent from the participant's supervisor letter of consent from your Embassy in Japan, medical certificate. Please ask National Staffs in JICA office for the details.

- 8) Must not be serving any form of military service.
- 9) Age: be under forty (40) years of age

### 3. Required Documents for Application

- (1) **Application Form:** The Application Form is available at the respective country's JICA office or the Embassy of Japan.
- (2) **Nominee's English Score Sheet:** to be submitted with the application form. If you have any official documentation of English ability (e.g., TOEFL, TOEIC, IELTS), please attach it (or a copy) to the application form.
- (3) **Country and Job Report and Questionnaire:** to be submitted with the application form. Fill in Annex and of this General Information, and submit it along with the Nomination Form.

### 4. Procedure for Application and Selection :

#### (1) Submitting the Application Documents:

Closing date for application to the JICA Center in JAPAN: **June 4, 2010**

**Note: Please confirm the closing date set by the respective country's JICA office or Embassy of Japan of your country to meet the final date in Japan.**

#### (2) Selection:

After receiving the document(s) through due administrative procedures in the respective government, the respective country's JICA office (or Japanese Embassy) shall conduct screenings, and send the documents to the JICA Center in charge in Japan, which organizes this project. Selection shall be made by the JICA Center in consultation with the organizations concerned in Japan based on submitted documents according to qualifications. *The organization with intention to utilize the opportunity of this program will be highly*

*valued in the selection.*

### **(3) Notice of Acceptance**

Notification of results shall be made by the respective country's JICA office (or Embassy of Japan) to the respective Government by **not later than June 25, 2010.**

### **5. Document(s) to be submitted by accepted participants:**

Inception Report -- to be submitted by **July 25, 2010:**

Before coming to Japan, only accepted participants are given the following preliminary tasks;

- 1) report-making on the current work (research) including own topic for case study, and the GIS related issues and the solutions by the use of GIS.
- 2) Voluntary pre-departure study; to read papers and documents relating to FOSS 4G (to be specified)

Detailed information about the Inception Report is provided in the Message Sheet to be given with the notice of acceptance. The Inception Report should be sent to JICA Chubu preferably by e-mail to [cbictp1@jica.go.jp](mailto:cbictp1@jica.go.jp)

### **6. Conditions for Attendance:**

- (1) to observe the schedule of the program,
- (2) not to change the program subjects or extend the period of stay in Japan,
- (3) not to bring any members of their family,
- (4) to return to their home countries at the end of the program in Japan according to the travel schedule designated by JICA,
- (5) to refrain from engaging in political activities, or any form of employment for profit or gain,
- (6) to observe the rules and regulations of their place of accommodation and not to change the accommodation designated by JICA, and
- (7) to participate the whole program including a preparatory phase prior to the program in Japan. Applying organizations, after receiving notice of acceptance for their nominees, are expected to carry out the actions described in section -9 and section -5.

## IV. Administrative Arrangements

### 1. Organizer:

(1) **Name:** JICA Chubu

(2) **Contact:** Mr. ICHIEDA Takeo (cbictp1@jica.go.jp)

### 2. Implementing Partner:

(1) **Name:** International Cooperation Center for Agricultural Education (ICCAE), Nagoya University

(2) **Contact:** Prof. ASANUMA Shuichi, Ph. D. (iccae@agr.nagoya-u.ac.jp)

(3) **URL:** <http://iccae.agr.nagoya-u.ac.jp/index.html>

(4) **Remark:** The International Cooperation Center for Agricultural Education (ICCAE) is a research institute mandated to function as a leading center for international cooperation in agricultural education. It was established in April, 1999, at Nagoya University, under the initiative of the Ministry of Education, Science Sports and Culture of Japan. ICCAE has been engaged in the many undertakings, in collaboration with several domestic and overseas universities, international cooperation agencies and educational/research institutions. Through these activities ICCAE has been strengthening the educational and research capacities of agricultural universities in developing countries, evaluating projects implemented by various international cooperation agencies, undertaking research related to agricultural and rural development in developing countries, and capacity building for researchers and technicians from developing countries and Japan.

### 3. Travel to Japan:

(1) **Air Ticket:** The cost of a round-trip ticket between an international airport designated by JICA and Japan will be borne by JICA.

(2) **Travel Insurance:** Term of Insurance: From arrival to departure in Japan. The traveling time outside Japan shall not be covered.

### 4. Accommodation in Japan:

JICA will arrange the following accommodations for the participants in Japan:

JICA Chubu International Center (JICA Chubu)

Address: 4-60-7 Hiraikecho, Nakamura-ku, Nagoya 453-0872, Japan

TEL: 81-52-533-0220 FAX: 81-52-564-3751

(where "81" is the country code for Japan, and "52" is the local area code)

If there is no vacancy at JICA Chubu, JICA will arrange alternative accommodations for the participants.

### 5. Expenses:

The following expenses will be provided for the participants by JICA:

(1) Allowances for accommodation, living expenses, outfit, and shipping

- (2) Expenses for study tours (basically in the form of train tickets).
- (3) Free medical care for participants who become ill after arriving in Japan (costs related to pre-existing illness, pregnancy, or dental treatment are not included.)
- (4) Expenses for program implementation, including materials  
For more details, please see p. 9-16 of the brochure for participants titled “KENSU-IN GUIDE BOOK,” which will be given to the selected participants before (or at the time of) the pre-departure orientation.

**6. Pre-departure Orientation:**

A pre-departure orientation will be held at the respective country’s JICA office (or Japanese Embassy), to provide participants with details on travel to Japan, conditions of the workshop, and other matters.

## ***V. Other Information***

**1. Development Education Program**

For the promotion of mutual friendship, JICA Chubu encourages international exchange between JICA participants and local communities, including school and university students as a part of development education program. JICA participants are expected to contribute by attending such activities and may be asked to make presentations on the society, economy and culture of their home countries.

## ANNEX I

### Country and Job Report

Please use other papers, if it is necessary.

1	Name of Project	
2	Name of Nominee	
3	Name of Country	
4	Name of Organization	
	Address	
	Phone & Fax Number	
	Your E-mail Address	
5	Your Post and Duty	
6	Your experience using GIS	
	(1) How many years of experience using GIS do you have?	
	(2) Describe concretely your experience using GIS (eg. mapping, remote sensing, etc.).	
	(3) GIS software you have ever used	
7	General information related to sustainable management of land use and natural resources, respectively	
	(1) Managerial system in your country (including organizational chart)	
	(2) Characteristics of your country's land use and natural resources, respectively	
	(3) Current situation regarding land use and natural resources, respectively, in your country	
	(4) Current situation regarding GIS technology used for management of land use and/or natural resources	
	(5) Major problems to be solved by using GIS technology in order to develop better managerial systems for land use and natural resources in your country and their particular problems to be solved immediately and used as own case study in this Program.	
	(6) Please describe the training systems of GIS technology in your country	

## ANNEX II

### Questionnaire

Please describe applicant's position and organization and working environment.

1	Your occupational background	
	(1) Your previous and present positions (posts) with years of experience	
	(2) Your functions and duties	
2	Detailed description of the work of your organization *Please attach a chart of your organization (with number of staff members and mark your position).	
3	Please answer the following questions concerning your working environment.	
	(1) Number of personal computers in your office	
	(2) Type or specifications of the computer equipment.	
	(3) Type, specification, or number of equipments related to GIS and/or remote sensing	
	(4) GIS software used in your office	
4	Expectations from the project in connection with your plan for the future development of management systems for land use and/or natural resources in your country (Please refer the statement in (5) of Country and Job Report.)	

**ANNEX III**

**Action Plan (no page limit)**

1	Your Name	
2	Affiliation (Position), Country	
3	What learned during the program?	
	(1) Introduction	
	(2) First week	
	(3) Second week	
	(4) Third week

### **-Completion Report-**

April 1, 2008

To Resident Representative of JICA Bangladesh

### **Completion Report of Group Training Program “School Health” in JFY2008\***

On behalf of the Health Office of Padma District, I, the undersigned, hereby report that we have completed Group Training Program “School Health” which was implemented from June to August 2008. Please kindly find the followings for what we have achieved in the program.

#### **1. Achievement of the program objective**

(sample) : We have achieved the program objective. The plan of the pilot project on prevention of youth’s smoking has been authorized by our director general as attached.

#### **2. Description of finalization phase**

(sample) : With the officials concerned and the principals of 10 primary schools in our district, we had series of meetings to elaborate the draft plan of the pilot project. Then its draft final was submitted to our director general for her authorization.

#### **3. Future actions**

(sample) : The project is supposed to start in the next two month with two of the target schools and complete by December 2008.

#### **4. Comments on this program, if any**

Best regards,

### **JICA and Capacity Development**

The key concept underpinning JICA operations since its establishment in 1974 has been the conviction that “capacity development” is central to the socioeconomic development of any country, regardless of the specific operational scheme one may be undertaking, i.e. expert assignments, development projects, development study projects, training programs, JOCV programs, etc.

Within this wide range of programs, Training Programs have long occupied an important place in JICA operations. Conducted in Japan, they provide partner countries with opportunities to acquire practical knowledge accumulated in Japanese society. Participants dispatched by partner countries might find useful knowledge and re-create their own knowledge for enhancement of their own capacity or that of the organization and society to which they belong.

About 460 pre-organized programs cover a wide range of professional fields, ranging from education, health, infrastructure, energy, trade and finance, to agriculture, rural development, gender mainstreaming, and environmental protection. A variety of programs are being customized to address the specific needs of different target organizations, such as policy-making organizations, service provision organizations, as well as research and academic institutions. Some programs are organized to target a certain group of countries with similar developmental challenges.

### **Japanese Development Experience**

Japan was the first non-Western country to successfully modernize its society and industrialize its economy. At the core of this process, which started more than 140 years ago, was the “*adopt and adapt*” concept by which a wide range of appropriate skills and knowledge have been imported from developed countries; these skills and knowledge have been adapted and/or improved using local skills, knowledge and initiatives. They finally became internalized in Japanese society to suit its local needs and conditions.

From engineering technology to production management methods, most of the know-how that has enabled Japan to become what it is today has emanated from this “*adoption and adaptation*” process, which, of course, has been accompanied by countless failures and errors behind the success stories. We presume that such experiences, both successful and unsuccessful, will be useful to our partners who are trying to address the challenges currently faced by developing countries.

However, it is rather challenging to share with our partners this whole body of Japan’s developmental experience. This difficulty has to do, in part, with the challenge of explaining a body of “tacit knowledge,” a type of knowledge that cannot fully be expressed in words or numbers. Adding to this difficulty are the social and cultural systems of Japan that vastly differ from those of other Western industrialized countries, and hence still remain unfamiliar to many partner countries. Simply stated, coming to Japan might be one way of overcoming such a cultural gap.

JICA, therefore, would like to invite as many leaders of partner countries as possible to come and visit us, to mingle with the Japanese people, and witness the advantages as well as the disadvantages of Japanese systems, so that integration of their findings might help them reach their developmental objectives.
